Overview

Report generated:	10/03/2026 00:31:01
Guest System:	Linux Ultimate

Indicators

System Summary (1)

0.0 Classification label

Persistence and Installation Behavior (3)

1.0 Executes commands using a shell command-line interpreter

1.0 Executes the "systemctl" command used for controlling the systemd system and service manager

1.0 Creates hidden files and/or directories

Malware Analysis System Evasion (1)

1.0 Uses the "uname" system call to query kernel version information (possible evasion)

Mitre Attack

Resource Development

- T1064 Scripting (confidence: medium)

Persistence

- T1543.002 Systemd Service (confidence: medium)
- T1064 Scripting (confidence: medium)

Privilege Escalation

- T1543.002 Systemd Service (confidence: medium)

Defense Evasion

- T1564.001 Hidden Files and Directories (confidence: medium)

Discovery

- T1518.001 Security Software Discovery (confidence: medium)

Dropped Info

Non malicious dropped files (3)
